BAUER MONOSTAR

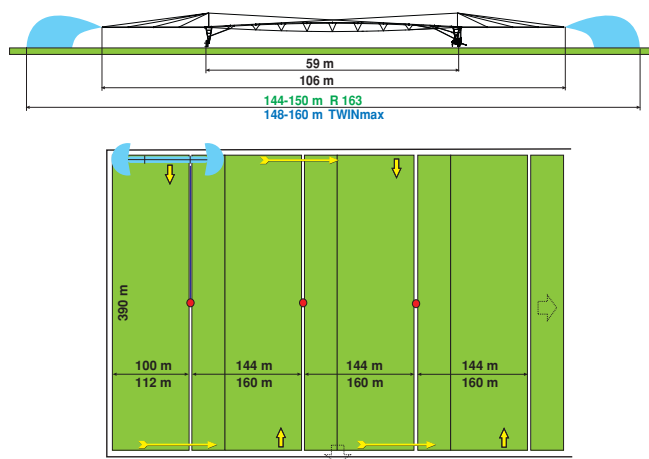

The energy efficient way to irrigate

- Suited to a variety of crop types and applications
- Flexible irrigation system – swiveling, towable or self-propelled
- Energy efficient – low connection pressure
- Low operating costs
- Range of sprinkler packages to select from
- Proven high irrigation efficiency (up to 93%)
- Versatility – suited to pasture and row cropping
- Optional remote control via SMS messaging
- Optional under slung for poor quality water

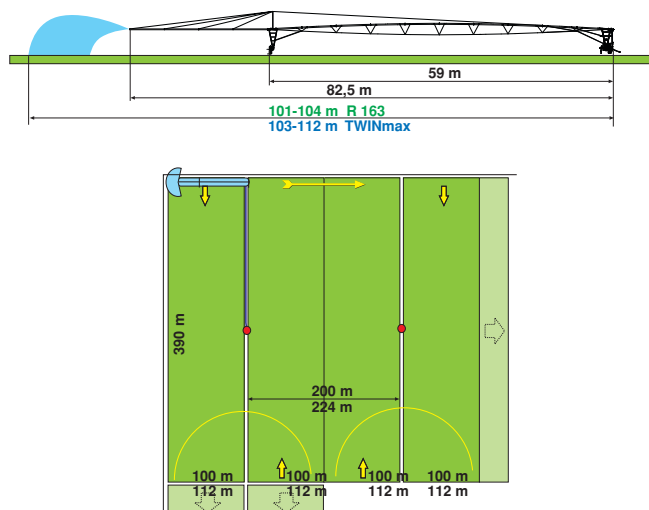

Monostar towable

Monostar with double-sided overhang allows irrigation strip widths of up to 160 m.

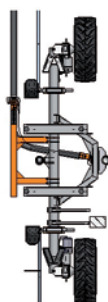

Monostar swiveling, towable

Monostar with overhang on one side allows irrigation strip widths of up to 224 m after having swiveled.

Double hose connection

- The hose connection is always on the side of the hydrant thus saving time and work.
- Narrow cart laneway maximizes field potential
- Easy assembly – retrofit

Versatile, simple operation
Programmable, easy entry of precipitation rate and operating mode such as linear operation, rotation of the wheels, pivot operation and transport mode. Remote operation using SMS messaging – retrofit available.

Furrow guidance system
Skids gliding in the furrow ensures correct alignment of the system. Skids can be folded away for transport and swiveling.

Rotation of the wheels with the push of a button
Easy and fast swiveling of the wheels at the cart via control box (optional at end tower).

Time saving towing
After rotating the wheels the Monostar can be towed to the next field or irrigation strip.

Fixed turning point
Hydraulic lowering of a support leg ensures stability of the system in pivot mode.

MONOSTAR

System length	82,5 or 106 m
Irrigated strip width	101 up to 160 m
Irrigation capacity	up to 120 m ³ /h
Connecting pressure	3 bar with endgun
Drag hose	up to 4" / 200 m
Speed max.	165 m/h
